

The invention contest of the new generation

DTEC Genius Lock

Name of College Detudom Technical College

Type of English Presentation Innovation and Invention Based on Research Methodology Contest

<p>Abstract :</p>	<p>The objectives of the invention are to create the DTEC Genius lock, to study the effectiveness of DTEC Genius lock and to study the satisfaction. The sample selected through purposive sampling technique 50 people. There are students, general public, policeman, security guard, and some companies in Detudom district of Ubonratchathani province. The instruments were DTEC Genius lock and satisfaction questionnaires. The study took for 6 weeks of using DTEC Genius lock. The data were analyzed from mean and standard deviation. The result of the study show that, The effectiveness of DTEC Genius lock was concluded from their properties such as, it has auto lock, GPS and warning system by smartphone. It can solve the problem of the motorcycle being stolen and the user satisfaction was also at good level.</p>
<p>Features and Benefits :</p>	<p>, it has auto lock, GPS and warning system by smartphone It can solve the problem of the motorcycle being stolen</p>
