

The invention contest of the new generation

Twin Dragon

Name of College Phitsanulok Vocational College

Type of English Presentation Innovation and Invention Based on Research Methodology Contest

Abstract :	The objective aimed to create Twin dragon screwdriver for decreasing surface damage, to compare the surface damage during use for both a normal screwdriver and Twin dragon screwdriver.
Features and Benefits :	<p>The use of Twin dragon screwdrivers is more effective than the other normal screwdrivers. Twin dragon screwdrivers can help save time and reduce work load, thus making it a preferable option and easily to use even skillfulness.</p> <p>After comparing the surface damage during use for both a normal screwdriver and Twin dragon screwdriver, we can see that Twin dragon screwdrivers is more effective than the other normal screwdrivers.</p>
