

Corn cracker machine

Name of College Hatyai Technical College

Type of English Presentation Innovation and Invention Based on Research Methodology Contest

<p>Abstract :</p>	<p>This research aims to : 1) Corn cracker machine. 2) to find the efficiency of Corn cracker machine. 3) to study the satisfaction of the use of Corn cracker machine, Population and simple including farmer, 10, were acquired using a selective approach. The instruments used in the research were the experimental results and the satisfaction questionnaire. The results showed that the efficiency of rice carving was 100.00%. The users were satisfied with the overall use of the machine and the use of rice machine. The SD score was 0.55, indicating that the sample size was high (SD) of 4.54 and standard deviation This is consistent with the corn kernels developed by the researcher.</p>
<p>Benefits and Features :</p>	<p>1. Workable Can be tested and obtained corn kernels using corn kernels. 2. The model of the prototype can be distributed to farmers. Or interested parties Design and construction of sheep carcass machine for animal feed.</p>
